Proposal of: Cafe & Restaurant Management System

1. Team Members :
Mohammad Hadi Soltani

2. Project Vision
This project aims to develop a Cafe and Restaurant Management System that helps staff manage daily restaurant activities more easily. The system allows waiters to view the menu, select food and drinks, manage order quantities, and register orders for different tables.

It also provides a cashier panel for calculating total costs and managing payments, as well as a management panel for managing menu items, prices, and viewing sales information.

The main goal of this project is to make the ordering and payment process faster, easier, and more organized.

3. Target Audience

- Waiters: Employees who take customer orders and manage table orders.
- Cashiers: Employees who calculate bills and handle customer payments.
- Managers: People who manage menu items, prices, tables, and restaurant information.

4. Core Features — User Stories

1. As a staff member, I want to log in so that I can access the system based on my role.

2. As a waiter, I want to view the food and drink menu so that I can see all available items.

3. As a waiter, I want to view menu items by category so that I can find items more easily.

4. As a waiter, I want to search for menu items so that I can quickly find a specific food or drink.

5. As a waiter, I want to select food and drinks so that I can add them to a customer's order.

6. As a waiter, I want to increase or decrease item quantities so that I can register the correct number of items.

7. As a waiter, I want to select a table number so that each order is assigned to the correct table.

8. As a waiter, I want to add or remove items from an order so that I can correct orders when needed.

9. As a waiter, I want to submit an order so that the cashier can receive and process it.

10. As a waiter, I want to view active orders so that I can check the status of each table's order.

11. As a cashier, I want to view all registered orders so that I can manage customer bills.

12. As a cashier, I want to calculate the total cost of an order so that I can show the final amount to the customer.

13. As a cashier, I want to mark an order as paid so that completed payments can be recorded.

14. As a cashier, I want to view paid and unpaid orders so that I can keep track of payments.

15. As a manager, I want to add, edit, and delete menu items so that I can keep the restaurant menu updated.

16. As a manager, I want to manage food and drink categories so that menu items are organized.

17. As a manager, I want to change item prices so that the menu always has correct prices.

18. As a manager, I want to manage table information so that I can keep track of restaurant tables.

19. As a manager, I want to view daily sales so that I can monitor the restaurant's income.

20. As a manager, I want to view the dashboard overview so that I can see total sales, orders, and other important information.

21. As a manager, I want to manage staff accounts so that I can control access to the system.

22. As a manager, I want to access system settings so that I can manage basic system configurations.
